

Flexiti Financial

Flexiti has reimagined point-of-sale (POS) consumer financing to drive sales for retailers in-store and online, and is one of Canada's leading private label credit card issuers. Through our award-winning platform, we deliver a POS financing experience across any device that is customer-centric, simple and intuitive. Without the need to integrate into existing POS systems, retail partners can easily offer the same fast and paperless financing solution across all retail locations and sales channels to increase revenue and build loyalty through repeat purchases. Flexiti's joint venture with Globalive Technology demonstrates its commitment to innovation in the payments space through the development of solutions leveraging artificial intelligence and blockchain technology. With high approval rates, innovative products and services, flexible promotional offers and a partnership-first approach, Flexiti is helping people improve their lives through better financing. Full Stack Developer

Flexiti Financial is looking for a Full Stack Developer to join its technology team. You will have the opportunity to contribute to all stages of the software development lifecycle in an Agile environment. You are a technology expert, entrepreneurship enthusiast, and passionate coder. You are a know-how in constructing, maintaining, and scaling advanced IT-architecture, have already developed machine learning concepts and implemented those. In addition, you are keen to solve current challenges faced by commercial banking.

Responsibilities

- Design, implement, and launch critical product features in a fast-paced environment
- Architect and design solutions to challenging infrastructure and third-party API constraints
- Working with a multidisciplinary team to understand system/application requirements and recommend appropriate solutions
- Independently, and as part of a team, develop software solutions that meets system needs and perform efficiently and as designed
- Capable of performing a range of programming functions while applying technical best practices
- Unit testing and program debugging
- Willingness to explore new technologies, learn new concepts and share ideas with others
- Capable of performance optimizations

Qualifications

- Bachelor degree in Computer Science, Engineering, Mathematics or a related field
- Spanish is an asset
- Java spring framework
- Angular and javascript
- C#, .NET Core
- RESTful APIs
- JavaScript, UI frameworks (Vue, React)
- Relational databases, such as Microsoft SQL Server or PostgreSQL

- MuleSoft is a big asset.
- Track record in building scalable architectures preferably in startups or within financial services banking - specifically credit card
- Practice in managing development teams by mentoring and practical support. This includes application oriented experience with databases (e.g. MySQL), Node.js and AWS (server infrastructure)
- Intermediate to expert level experience with Angular
- Experience implementing Open Source frameworks (from Angular 2 to Magento)
- Develop and test web application stack composed of ReactJS / Redux / Jest / MongoDB
- Python and frameworks like React or Angular experience is an advantage
- Able to set priorities and fulfill deadlines
- Good communicator capable of expressing challenges ahead
- Solution and detailed oriented professional
- Strong decision making ability and hands-on mentality
- Great communication and enjoy working in a team
