

Flexiti Financial

Flexiti has reimagined point-of-sale (POS) consumer financing to drive sales for retailers in-store and online, becoming one of Canada's leading private label credit card issuers. Through our award-winning platform, we deliver a POS financing experience across any device that is customer-centric, simple and intuitive. Without the need to integrate into existing POS systems, retail partners can easily offer the same fast and paperless financing solution across all retail locations and sales channels to increase revenue and build loyalty through repeat purchases. For more information, visit www.flexiti.com.

DevOps and Cloud Engineer

Flexiti Financial is looking for a DevOps and Cloud Engineer to join its Technology team. Supporting the VP of Data and Cyber Security, the DevOps Engineer will play a critical role with our build, deployment and cloud strategy for our clients.

Responsibilities

- Automate the provisioning of AWS environments with Terraform and Ansible to provide fast and reliable services to a rapidly growing customer.
- Design and develop automation workflows, performing unit tests, code quality measures and running and conducting reviews assessing the overall quality of delivered components using tools such as SonarQube.
- Building and maintaining continuous delivery pipelines using Azure DevOps.
- Write scripts and automation using Powershell/Python/Bash.
- Configure and manage data sources like MSSQL, MongoDB, MySQL, Elasticsearch, Redis, etc.
- Support the development team Docker containers adoption.
- Manage GIT source controls.
- Create and maintain documentation.
- Identify and drive opportunities to improve automation for the company; scope and create automation for deployment.

Qualifications

- Bachelor's degree in computer science or information technology
- 3-5 years of experience as a system / DevOps Engineer
- Experience working with information technologies and systems analysis, ideally in the financial technology industry
- Experience with Java spring framework, Angular and javascript, C#, .NET Core, RESTful APIs, JavaScript, UI frameworks (Vue, React), relational databases, such as Microsoft SQL Server or PostgreSQL
- Working experience with Kubernetes
- MuleSoft is a big asset
- Working knowledge of a wide variety of programming languages (specifically, experience in C# and JavaScript, working with RESTful APIs and with relational databases (SQL)

- Experience in an Agile development environment
- 2 years of experience developing C# MVC applications & restful API with dotnet core to create custom delivery automation.
- Strong communication skills and ability to work both in a team environment and independently.
